COLLISION INVESTIGATION TOOLKIT

Fast, easy video toolkit for Forensic Collision Investigators

“Kinesense Collision Investigation Toolkit is an easy to use solution which enables me to quickly calculate vehicle speed in video when investigating road accidents.”

Forensic Collision Investigator

Kinesense Collision Toolkit is an easy-to-use tool that lets you rapidly exploit video during forensic collision investigations. Forensic collision investigators often rely on video from the incident scene to determine events including speed or velocity analysis. The **Kinesense Collision Toolkit** enables investigators to automatically calculate the speed of a vehicle utilizing defined parameters and in-built algorithms.

The toolkit converts video from different digital and analog sources into a viewable format, enabling you to utilize incident scene videos. Algorithms can be deployed using a few key measured parameters, making velocity calculations quick and easy. You can export and print your audit trail along with your video report for court or team briefings. Advanced reporting features mean you can show two videos side by side during accident reconstructions, so that non-technical parties can easily understand the experts opinions regarding the event.

Kinesense Collision Toolkit key benefits:

- Automates speed calculation
- Makes it easy to view videos from a collision scene
- Speeds up the forensic video collision investigation
- Simplifies report making
- Reduces costs

Kinesense Collision Toolkit makes it easy to utilize video during collision investigations. Available as part of the Kinesense LE suite. To talk to us more about your requirements, contact us at info@kinesensevca.com.

Kinesense Collision Toolkit key features:

Function	Description	Advantages
Import	<ul style="list-style-type: none">• Batch-import digital files• Convert analog video	<ul style="list-style-type: none">• Utilize video from an incident scene
Review	<ul style="list-style-type: none">• Automatically calculate vehicle speed• Choose important clips and images easily	<ul style="list-style-type: none">• Complete video collision investigation tool• Saves time
Report	<ul style="list-style-type: none">• Slide by side viewing of video clips• Add case notes• Create court presentations	<ul style="list-style-type: none">• Easy storyboard creation• Automatic disclosure reporting
